THE SOUTH PART OF CHINA

Although the South is Yet at Peace.

THE SIGNS ARE OMINOUS.

Inflammatory Placards Urging War Are Posted. Rising Expected at Any Moment.

HONG KONG, Aug. 20.—Though as yet the disturbances up north have not spread to this part of China, there are indications that there is an under current throughout the province of Kwang Tung which may at any moment break out and lead to loss of life and destruction of property. Inflammatory placards, urging the natives to rise against the "foreign devils," have been posted at Canton, Fu Chow and other places, and consequently the missionaries in the outlying districts are flying to places of safety, many of them crowd ing into Hong Kong and Macao. When the missionaries were clearing out of Fu Chow the natives commenced to jeer, saying the foreigners were getting scared and they had better kill them right away. They were, however, not molested in any way, arriving at Hong Kong without a mishap. There is hardly a doubt that there would have been a disturbance at Fu Chow before now had it not been for the close proximity of the river gunboats Sandpiper and Robin and a torpedo boat, which were patrolling the West river.

The Redpole and the Don Juan, of Austria, are at Canton for the defense of the Europeans there. The Princeton, which arrived from Manila Saturday, also went to Canton on the following day with the intention of staying there a few days and then going up north. The two bridges connecting the Shamen—the little island on which the Europeans reside with the native city—are guarded by Gatlings and marines, and soldiers patrol the "Bund" day and night.

The Chinese are also preparing for eventualities. The troops in Canton have been doubled and eleven or twelve fresh pieces of cannon have been mounted. Some 5,000 Chinese soldiers have been sent to guard the Bogue forts on the river leading from Hong Kong to Canton, and it is not unlikely that the next warship which goes up from Hong Kong will be fired upon.

It is felt by the Europeans and the better class of Chinese in Canton, that it is only the influence of Viceroy Li Hung Chang which has kept this part of China quiet so long. Hence when it was reported that he was going to Peking he was strongly urged to remain where he is, and for the time being at any rate he has yielded to the request.

There is no doubt that the departure of his excellency for Peking at this juncture would be a serious matter for the colony of Hong Kong, which borders the province of Kwang Tung, notably one of the most turbulent of the whole eighteen.

The towns and villages on the border have all been the haunts of restless characters. Sam Chun, the place occupied and then given up by the British, and vicinity, have already shown signs of disquietude.

The inhabitants have held meetings to consider how they can procure arms, and have threatened to attack the British police stations and kill the occupants. Consequently the staffs have been largely increased. Then at Sal Kung, in the new territory near Mirs bay, there is reason to believe that the members of the Triad societies contemplate mischief, and in consequence a strong body of police has been sent over to patrol the district.

The man-of-war anchorage is quite deserted, only three war vessels—the Buenaventura, the Monterey and a Dutch boat—being there.

Mexican Silver and Silk.

The Chinese war, if dragged out indefinitely, may make a demand not merely for Mexican silver but Mexican silk as well. The silk worm industry in this country, though a recent creation, is capable of large developments. In the interior and in some parts of the south the soil is well adapted to this cultivation. About ten years ago, a Frenchman of Mexico City, M. Hippolite Chambon, while traveling in the interior of Mexico, found lands in the states of Queretaro, Guanajuato and Jalisco well adapted for mulberry cul-

tivation, the trees giving even better results than in Algeria, and as good as in China and Japan. Returning to the City of Mexico, Chambon obtained a concession and planted 1,000,000 mulberry trees in the states of Guanajuato and Jalisco. He also built a factory in this city, near the American cemetery, but it crumbled during the earthquake some eighteen months ago and had to be rebuilt. In this factory are made some excellent silk shawls (rebozas) and silk headwear for ladies is woven from silk produced near the historic farm of the immortal Hidalgo. A silk-worm made its appearance in Guanajuato, but the government is extirpating the insect.

Columbia, B. C., in Ashes.

VANCOUVER, B. C., Aug. 20.—The little town of Columbia, situated on the kettle river, in the well known Boundary Creek mining district, was reduced to ashes last week. The loss will be close to \$150,000, which is half the price paid by a syndicate a few days ago for the town site and buildings. The town was on the mountain slope, just across the river from Grand Forks. The population of the town was between 750 and 1,000. The fire started in a pile of shavings.

LETTER FROM CAPE NOME.

Is a Frost of First Freezing. No Work of Any Kind.

NOME CITY, ALASKA, July 30, 1900.

The following letter has been received by Joseph C. Chisholm, of this city, from a friend at Nome:

Dear Joe: It is a frost of the first freezing. The most resplendent bubble that's ever been floated. This wild cat is no common little animal; it's a royal Bengal tiger.

Twenty thousand people making side jumps up and down the beach, across the tundra, along the creeks, all cursing their luck and wishing they were back in civilization.

Two-thirds of the crowd are broke. The gin mills and gamblers are up against it also. Everybody is thoroughly disgusted. No one hears "Gold" any more—it's all "Home" now. There is no work of any kind. The maximum number of men at work in the gulches is about one hundred. From fifty cents to two and three dollars a day is made on some parts of the beach by a few men.

The beach was all worked last summer, and only a few streaks are left here and there. There are to be seen some queer people and some very curious things around these diggings. Everything is pretty cheap. Drinks are two bits; mixed, four bits. But there's nobody buying any. Lucky Baldwin is up here. He is running a bum saloon, or at least he is about to try to run one. The grand opening is tomorrow night. We get twenty-four hours of daylight. This is the "land of the midnight sun," I believe. Well, one gets a glimpse of sunshine occasionally at midday. They say we are having beautiful weather here for this time of the year. Up to a few days ago the thermometer (it is a very giddy animal up here) would once or twice a week climb up to 40 degrees Fahrenheit, but in a twinkling it would be at home down around zero.

I'm just about to start for the great Anvil creek to see the Swedes, who are making all the good money.

Anvil is about twelve miles distant, and is the only producer in this country at present.

If something is not struck pretty soon there is going to be the Dickens to pay.

Give my regards to all the folks in Bisbee.

I remain your affectionate nephew,
WILLIAM B. COGHLAN.

Chicago Census Completed.

WASHINGTON, Aug.—Director Merriam declines to change his attitude on the census situation in Chicago. He says that the work of Supervisor Gilbert was performed under the direction of a special agent, who reports Mr. Gilbert thoroughly efficient and capable. Under the circumstances the director sees no reason for questioning the accuracy of the returns as sent in.

The returns from New York, Philadelphia and Chicago have practically been closed. It is said they will be given out for publication within a few days.

A dispute over the returns from Seattle, Washington, is now giving the director considerable annoyance. It is also engendering some hard feeling between the citizens of that city and of Portland, Oregon. Charges have been made that fraudulent returns were submitted from Seattle. Portland citizens assert that names were taken of passengers on boats touching at Seattle. It is also asserted that many persons who never lived in Seattle were given a residence in that city. The citizens of Seattle have filed a counter claim that the people of Portland are guilty of the same offense. Director Merriam has not decided what action will be taken.

TO MURDER THE RULERS

Lots Were Cast by the Anarchists.

WHO SHOULD ASSASSINATE

Five Rulers. President McKinley—Is Said to Be One of the Number.

NEW YORK, Aug. 20.—Lots were cast on May 1 by anarchists for the assassination of rulers. By the first lot Gaetano Bresci was selected to kill King Humbert. By the second — was chosen to slay President McKinley. Men were also chosen to assassinate President Loubet, of France, Emperor William, of Germany, and the emperor of Austria. The Italian consul general in this city was informed on May 16 of the plan to kill King Humbert and the authorities at Washington of the conspiracy to assassinate President McKinley.

Such are the startling statements made in a letter signed by C. Luigi Alfieri, who says he is a member of the anarchistic society of Anderson, N. J., and addressed to Sig. Barsotti, editor of Il Progresso Italo-Americano. Alfieri declares that the anarchists are now seeking his life and he is in hiding in this city. He dreads the chances of exposure, but says his conscience compelled him to make the statement.

Alfieri names the man who drew the second lot which was to determine who the assassin of President McKinley should be. He says the names of the men chosen to kill President Loubet, of France, Emperor William and the emperor of Austria will never be known.

Consul General Branchi when seen tonight at the Lotus club said that such a charge emanating from such a source, was unworthy of any answer. It was pointed out by him that a series of such letters has been sent to the Italian press and given prominence in Il Progresso.

WASHINGTON, Aug. 14.—Chief Wilkie is satisfied there is nothing in the story that an anarchist has been selected by lot to kill President McKinley. An anonymous letter was received several days ago making such a statement, but the matter was looked into far enough to convince the secret service officials that there was nothing in it.

HUNTINGTON'S DEATH

Shock's Galveston and Affected President Diaz.

GALVESTON, Aug. 20.—The death of Collis P. Huntington naturally caused a shock in Galveston because of the work on the great terminals and docks he had only fairly started here. His death causes some apprehension among the general public lest the large enterprises here may be somewhat abridged. However, those who have been in contact with him, and who understand the scope of the work, are perfectly assured that the development of Galveston will not be hindered or restricted. News of the death of Collis P. Huntington was quickly communicated to President Diaz, who was very much affected. Mr. Huntington at the time of his death was negotiating with the government regarding the extension of his railroad here.

AMERICA TO BE THE BANKER.

London Truth Says Such a Relation in the Future Is Probable.

LONDON, Aug. 20.—Truth, Henry Labouchere's paper, replying to some of the criticisms upon the placing of a large portion of the exchequer loan in the United States, says:

"We can see nothing derogatory in selling the bonds to America. It is an indication of the enormous growth of wealth in the United States. Nor would we be surprised if, in view of their continued prosperity, our American cousins were to act as our bankers in the future in a good many instances. We can see no harm in such a relation."

Will Repair Oregon at Kure.

WASHINGTON, Aug. 20.—The Japanese government has not informed this government that her dock at Kure could not be used by the Oregon long enough to make permanent repairs, as published today. But this government, knowing the great value of the dock at Kure, felt that it would be an im-

possibility to monopolize so valuable an adjunct of the Japanese navy just at this time, and therefore has decided that the Oregon shall be only temporarily repaired at present.

The word "temporarily" conveys, perhaps, a false impression, inasmuch as the repairs which she will undergo will be complete as far as they go. The repairs to the injuries in her hull will be complete when she leaves the Kure dock, but the work of repairing the interior fittings to her injured compartments will be postponed until some convenient time in the future. It is said at the navy department that when she leaves the Kure dock the Oregon can resume active service and remain in commission as long as may be deemed necessary.

LOCAL BRIEFS.

Consul Max Gavito was at Naco Sunday on official business.

Alfred Paul was among the holiday seekers who left by today's train.

L. J. Overlock has received a car load of fine cattle for his Union Meat market trade.

Ben Pringle, who now represents a hardware house, left here today to continue his travels.

H. E. Staetter, of St. Louis, was in town yesterday, looking up the business of his firm.

The Sunday tournament of the shooting club was held as usual yesterday. As yet we have not received the score.

J. H. La Rue, of San Francisco, arrived Saturday and took up his quarters at the Bessemer, from where he attempts to do his business in the city.

Mr. Kenney, proprietor of the California Meat Market, left Saturday for Mexico where he goes to purchase cattle for his extensive home business.

A big crowd went down to Naco last Saturday where they took in the dance given by the hospitable people of that town which as usual was a grand success.

Charley Overlock, genial, smiling and popular, stepped aboard the passenger today and will seek a quiet western tour where he may recuperate for a few days.

William Coghlan's letter which is printed herein will add one more to the many witnesses who bear evidence to the swindle that the cold region has proved to be so many.

There will be a big programme at Naco on the 16th of September, and preparations are being made to insure it being a success. The local Mexican band will play on that occasion.

The foundation is now complete for the big store being built by the Copper Queen Co. at Naco. The bricks are on the ground and the building will now be rapidly proceeded with.

Sheriff Scott White with two friends left by the last stage for the Cananess. The stage carried quite a load of ice and fruit, which was needed for the grand dance held at that camp Saturday evening.

George Pittock, the Tucson newspaper man, was whirled away by the morning flyer. He may stop off at the South Bisbee and give one of his eloquent and coherent accounts of that property.

William Beattie, who came up from Sulphur Springs valley last evening, informs us that there had been no rain there as yet. The valley is very dry, and things are looking very gloomy. Round on the ranges storms have been frequent.

James Williams, an expert miner who has been working at the Copper Queen mine for some months, received a telegram on Saturday announcing the serious illness of his wife, who is at their home at Grass Valley, California. Mr. Williams left for that town yesterday.

On Saturday last the little daughter of Charles E. Grace of this town was riding with a friend when she was thrown from her horse and sustained a fracture of both bones of the left arm. The little girl was taken to the hospital where she was immediately attended to by Dr. Sweet.

The reorganized Mexican band played before a crowd of Bisbee citizens last evening. The musicians showed a marked proficiency in the rendering of the various pieces, and they are to be congratulated on the taste shown in the selection of the music and the excellent performance of them. It is to be hoped the band will frequently play for us.

Last Saturday night the Cienotograph Lumiere at the Opera House was well attended and much appreciated. Sunday night the machine was out of order. Now it is in great shape again and at the performance from 8 to 8:30 or so, 7 or 8 views will be given free, proving that the performance is all that is claimed for it. Afterwards the regular program will be performed. The public are advised to visit this show which is very interesting and well worth seeing.

THEY WISH FOR PEACE

The Empress is Fleeing and Pursued

CLEANING OUT TARTAR CITY.

Still Bombarding the Fortifications. Cavalry Pursuing the Empress.

WASHINGTON, Aug. 20.—The Chinese government through Li Hung Chang has made application for the appointment of Minister Conger or some other American official with authority to open negotiations for the establishment of peace, and for the fixing of definite terms for the settlement of the present trouble.

The Bureau of Navigation this morning received the following cablegram from Admiral Remey:

"TAKU, Aug. 19.—Authentic report from Peking of 15th, from Lieut. Latimer, says the troops are moving on the Imperial city, are cleaning out the Tartar city. All the Americans who remained in Peking are well, except one child. The following were killed during siege at Peking: Sergeant J. F. Fanning; Privates C. X. King, J. W. Tougher, J. Kennedy, R. E. Thomas, A. Turner and H. Fisher. Wounded—Private J. Schroeder, elbow, now dangerously ill from fever. Seaman J. Mitchell, upper arm, severe, now recovering."

LONDON, Aug. 20.—The Japanese cavalry has left Peking in pursuit of the Dowager Empress and her court, according to telegrams from the north received at Shanghai by Chinese officials.

These dispatches aver that the empress and her train, protected by 30,000 troops, have already arrived at Wu Tai San, in Shan Si province.

The landing of the British troops at Shanghai is not causing any excitement among the natives. A detachment of 100 French marines landed there today.

BERLIN, Aug. 20.—Foreign office has received a dispatch from the German consul at Che Foo under today's date, saying that the Dowager Empress was believed to be inside the palace at Peking and that the allies were still bombarding the fortifications.

WASHINGTON, Aug. 20.—The state department has received a cablegram from Consul General Goodnow, at Shanghai, announcing the occupation of Peking by the allied troops and stating it is reported that the dowager empress and emperor left Peking on Aug. 13.

DUPED BY ENGLISH LAWYERS.

Belief in Kansas That the James' Inheritance Was Fraudulent.

SALINA, Kas., Aug. 20.—S. J. Osborn, speaker of the last Kansas house of representatives, has returned from England, where he was sent by the trustees of the Wesleyan University to investigate the inheritance of the Rev. T. H. James, and to find Mr. James himself. Mr. James returned to Kansas two days after Judge Osborn sailed from New York, after having been unheard of for a month. Judge Osborn says he believes Mr. James has been made the dupe of English attorneys, who wanted to get a fee from him.

RAINS PREVAL IN INDIA.

Lord Curzon Reports that Favorable Conditions Continue.

LONDON, Aug. 20.—The following dispatch has been received from the viceroy of India, Lord Curzon of Kedleston, by the secretary of state for India, Lord George Hamilton:

"The favorable conditions continue. Rain is falling generally throughout the country. The total number supported in all the famine stricken provinces is still large. Owing to the backwardness of the crops the restricted demands for labor in the fields and high prices continue. About 6,149,000 persons are receiving relief."

Metal Quotations.

NEW YORK, Aug. 20.—Copper steady brokers, 16 1/2; exchange, 16.60. Lead dull, unchanged.

Bar silver 61 1/2; Mexican dollars 48 1/2.

Delegate Wilson addressed a large audience last Wednesday at Safford. He met with a good reception.
